

GlobalFirst™

International Sponsor Organisation

A Unique ECOSYSTEM Design for Global Sponsorship Activities

Perspectives – an emerging form of global collaborative organisation

The International Sponsor Organisation or “*iso*” is designed as an entity which incorporates social and commercial (“SoCo”) objectives into its operational focus as a Sponsor of global projects, research, initiatives, events and enterprise, within a framework of environmental sensitivity, improving quality of life, and fostering international, country, enterprise and community cooperation.

The dynamic attributes of an *iso* include a public | private | partnership (P3) approach to commercial activities with an emphasis on social betterment!

iso an internationally-focused corporate citizen

The *iso* is a type of series llc designed to be an international corporate entity, with a focus on contributing to the global community, in both enterprise and social endeavours.

Its legal structure is that of a series limited liability company formed under Cayman Bermuda or British Virgin Islands law, benefiting from legal and juridical infrastructure of British common law and the Courts of England. An *iso* benefits from strict international based transparency, “know your

client” and anti-money laundering compliance requirements established under applicable regulatory authorities.

The *iso* structure and operations are subject to the GlobalFirst™ *iso* 1.0 Protocol License, its regulations and compliance requirements. These standards are designed to assure the international nature of the *iso* and third parties’ reliance thereon, as well as the continuous adoption of international best practices.

A Perfect International E | S | G Platform

- > **International Sponsors** -*iso*
Sponsors are comprised of international members.
- > **Identity & Integrity** -Each *iso*
Sponsor Representative, beneficial shareholders, and Governors are vetted under Cayman's strict KYC laws by the *iso*'s registered office company, as well as by the *iso*'s bankers and legal professionals. In addition, the *iso* is subject to the GlobalFirst™ *iso* Protocol License standards.
- > **Board of Governors** -The *iso*
Governors operate as a "Board of Governors", whereby their activities are based on the consensus of the whole, rather than the activities of a single Governor. The Board is to maintain its international nature through restrictions designed to limit the number of Governors from any one country. The Board is responsible for establishing and overseeing management and global operations.
- > **Ownership** -*iso* ownership
structure is designed to reflect its international character and focus on innovative enterprise and global philanthropy. Series LLC interests are held by non-profit charitable | educational foundations.
- > **Philanthropy** -These Foundation shareholders coordinate with the *iso* in synergistic philanthropic allocation of *iso* distributions.

Focus on sustainable growth and contributing to future generations

The *iso* operates globally as an active Sponsor, Developer, Operator and Promoter of its Core Focus activities, coordinating through its management, International Advisory Board and Core Focus members, supporting its clients, affiliations and communities

- > Core Focus - Members of the *iso*'s "Core Focus" comprise a team whose role is to provide leadership in shaping and evolving the *iso*'s Core Focus and expanding this class of member, bringing in new talent and expertise.
- > International Advisory Board -The Board of Directors may develop and expand a group of international advisors with expertise in the *iso*'s Core Focus activities.
- > IGX™ Convergent Platform -The GlobalFirst™ *iso* format qualifies an *iso* to interoperate on the IGX™

Convergent Platform, which enables enhanced funding, risk mitigation, access and revenue opportunities.

- > Risk | Assets | IP™ SPUs -As a GlobalFirst™ *iso*, this unique SPU Portfolio technology is available.
- > The IAC Cube™ -The *iso* is qualified to collaborate in the formation of special purpose IAC™ Insurers (IAC™).
- > Risk|Portfolio™ -The *iso* is a core component of the GlobalFirst™ Risk|Portfolio™ Program Protocol.

The ISO's international design qualifies it to interoperate with some of the most advanced asset and risk transfer technology

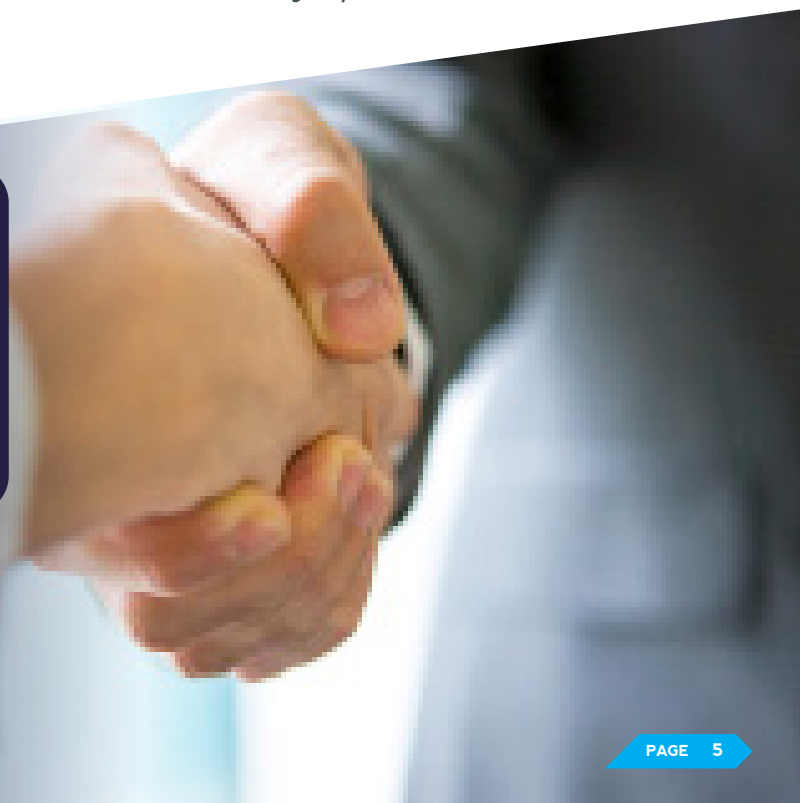

ISO Core Focus activities are designed to generate funding for its social and philanthropic objectives

Core Focus

“Core Focus” represents the focus of the *iso* in undertaking activities in which it seeks to engage on a global basis, within a framework of environmental sensitivity, best practices, modular innovation, risk mitigation, innovative capital funding, public|private|partnerships and international initiatives in a framework of “Know Your Client”, anti-money laundering, anti-terrorism financing, and sanctions regimes. These focuses may take the form of an Initiative or Program, as a Product, Process, Project or Technology, or through various types of

Transactions. They may be designed to benefit one or more Affiliated Enterprises, an Industry Group, a public or private Cause, or specific Communities of Interest.

The *iso* design intends that the “Core Focus” members form the nucleus of individuals and entities which support development and promotion of the *iso*’s Core Focus. The members of this group may expand through time as additional participants are admitted to this member group.

// the unique structure of an *iso* resolves many impediments to conducting international business and reduces cross-border issues //

Resources, Incentives & Collaboration =

IGX™ Convergent Platform - Risk | Portfolio™

An *iso* is qualified to establish applicable SPU's and IAC™ Insurers - key infrastructure for funding, risk mitigation, guarantee and valuation support to complement its Core Focus objectives. These resources enhance the *iso*'s capabilities in project development, social-commercial collaboration, project funding, and risk mitigation for multi-national corporate, government, sovereign funds, institutional investors and other international clients.

iso's International Advisory Board members benefit from remuneration and collaboration

Core Focus members receive distributions and collaborate with Core Focus participants

Core Focus income, service fees and administrative revenue from SPU & IAC™ fund Foundation distributions

iso Directors and management team benefit from compensation, collaboration and social engagement

A Collaborative Team

Key to creation and implementation of the *iso*'s Core Focus objectives, is development, awareness, promotion and collaboration between its Governors and Management, Core Focus members, International Advisory Board and specific Core Focus participants.

A Primary Focus

The Philanthropic P3 approach seeks to channel a substantial portion of the *iso*'s distributions to charitable, educational, research, training, team building, medical and philanthropic initiatives to benefit communities in which Core Focus is directed. These efforts may include character building youth activities related to Core Values of honesty, integrity, sportsmanship, respect, confidence, responsibility, courtesy and judgment.

This P3 focus is guided by ISO 26000:2010 - Guidance on Social Responsibility and urges compliance with its Global Reporting Initiative (GRI).

iso is not affiliated with the International Organization for Standardization (ISO) other than as a party which benefits from their standards.

Is an *iso* the solution

GLOBALFIRST™ LICENSED TECHNOLOGY PROTOCOL

The *iso*'s modular P3 design focuses on mitigating impediments to international operations resulting from security concerns, increased regulation, expanded reporting, country and cultural sensitivities, and increased technical | compliance rules.

SOCIAL- COMMUNITY COLLABORATION TOOLS

GlobalFirst™ is expanding its suite of components for collaborating, communicating, developing, storing and publishing information, data, workflows, processes and transaction activities to enhance *iso* Sponsor and Core Focus initiatives.

IGX™ CONVERGENT PLATFORM - RISK|PORTFOLIO™

iso s qualify to interoperate with IGX™ SPU's, DAO's, DIUs and IAC™ Insurers to benefit from an enhanced approach to project | portfolio funding and active generation of revenue through risk transfer, securitisation and mitigation, as well as financial guaranty.

NEXT STEPS - APPLY TO FORM AN *iso*

International requirements related to setting up an ISO, establishing its banking and professional relationships, and raising its initial capital have substantially changed in recent years. "*iso* Formation" assists in understanding these procedural requirements.
